API

Java

PHP

Etc,

Etc,

Etc.

Web Pages

Front End Code:	Back-end Code
HTML,	Ruby,
CSS,	Python,
Javascript	Java,
	C#,
	PHP

Web Apps

- A web application is hosted on a web server
- User types URL into a browser
- The browser (client-side) sends a request to the web server
- The server receives the request and processes it
- The server sends back the results to the client
- And, repeat

Web Inspector

How can you inspect code on a site?
